

UNIT-IV

Statistical Reasoning

2 Marks

1. What is uncertainty?
2. List the causes of uncertainty?
3. What is probabilistic reasoning?
4. What is the need of probabilistic reasoning in AI?
5. What is probability?
6. What is conditional probability?
7. Define Bayesian theorem?
8. Write the applications of Bayes theorem?
9. Define Bayesian networks?
10. Define Certainty factor?
11. Define rule based system?
12. Define slot filler structure?
13. Define semantic net?
14. Define frames?
15. Define scripts?

5 Marks and 10 Marks

1. Explain the Bayesian network with example?
2. Explain certainty factors?
3. List and explain the examples of certainty?
4. Explain ruled based system?
5. List and explain the examples of ruled based systems?
6. Explain the weak slot filler structures?
7. Explain semantic nets in detail?
8. Explain Frames in detail?
9. Explain Conceptual dependency?
10. List and Explain Scripts components?
11. Construct the script for going to movie?
