

UNIT-V

Natural Language Processing and Learning

2 Marks Questions.

1. Define NLP.
2. List components of NLP
3. List any 4 Applications of NLP
4. List Difficulties in NLU
5. List NLP Terminologies
6. List Steps involved in NLP
7. Define syntactic processing
8. Define Top down, Bottom up parsing.
9. Define semantic processing.
10. Define Spell Checking. List Errors.
11. What is learning?
12. What is Rote Learning
13. What is Induction learning?
14. Define Learning by taking advice.
15. Define Explanation based learning.
16. Define Learning by Analogy.
17. List Analogical reasoning steps.

5 Marks Questions

1. Write a note on NLP.
2. Explain briefly applications of NLP.
3. Explain NLP Difficulties and Terminologies.
4. Explain steps involved in NLP with a neat diagram.
5. Explain stages of syntactic analysis.
6. Explain semantic Processing in detail.
7. Explain semantic Analysis in detail.
8. Write a note on spell checking.
9. Write a note on Rote and Induction Learning.
10. Write a note on Analogy.
